

**CYBER SERIES DIDO PORT / SMALL CASE  
TERMINAL AND PRINTER MOUNTING PLATE 9000/43**

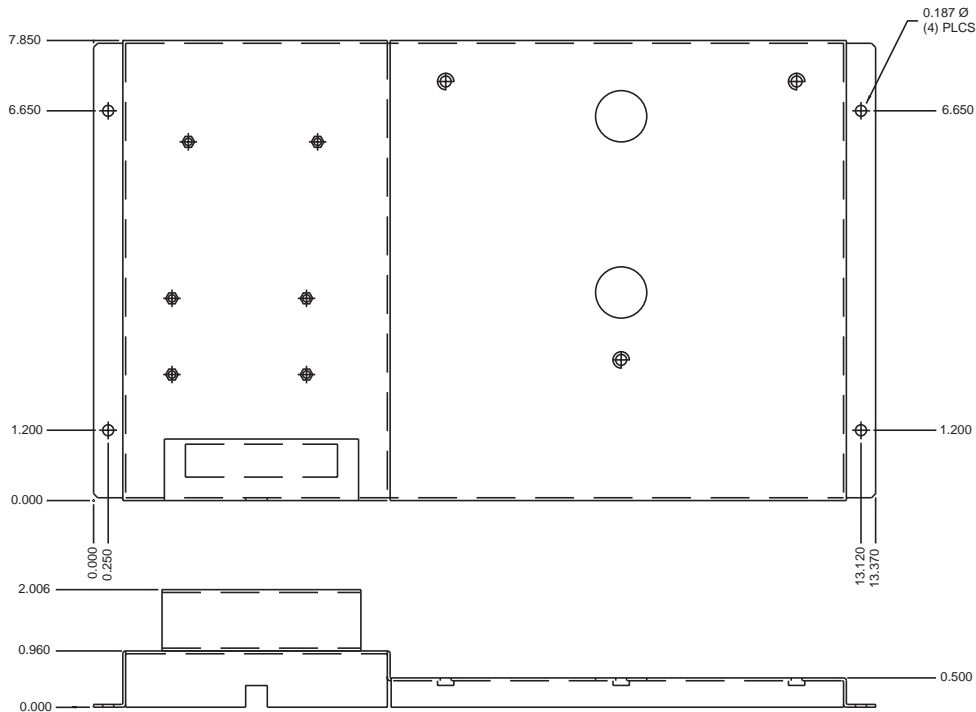

Accu-Time P/N 9000/43 is a mounting plate for a Cyber Series small case terminal and a Citizen iDP 3110 or similar model receipt printer using the terminal's AUX DIDO port. Made from 18-gauge steel, the plate ensures secure mounting for the terminal and printer. Pre-located mounting screws lock the terminal and printer in place.

The plate is finished with a durable black powder coat paint with fine texture finish that matches the terminal's base. A tamper shield integrated into the plate's design protects the printer's power and data connectors from accidental or deliberate unplugging.

An accompanying serial adapter P/N 98-9002-18 mounted on the back of the plate interfaces a standard ATS 6-conductor interface cable with modular connector to a 25-pin D-sub connector suitable for the printer, enabling easy interconnection of the terminal and printer. The supplied 6-conductor interface cable is designed to plug into the terminal's AUX DIDO port. The supplied 25-pin D-sub connector is designed to plug into the rear of the printer. Because the printer uses the terminal's AUX DIDO port, the terminal cannot have a finger scan biometric reader installed. The terminal can use either serial or Ethernet host communication.

The terminal and the printer require separate power supplies. A short power cable provided with the 9000/43 facilitates power connection to the printer. Power and data cables can be routed through a small access hole located in the bottom edge of the plate.

Dimensions: 1.16" H X 7.85" W X 13.37" L (29.5mm X 199.4mm X 339.6mm)  
Weight: 2.2 Lb. (1.0 Kg)
