For Immediate Release

Accu-Time Systems, Inc. Completes Acquisition of Substantially All Assets of BioMet Partners, Inc.

Ellington, CT – October 22, 2007 - Accu-Time Systems, Inc., a leading manufacturer of workforce management, time and attendance, and security access products, announced today that it has closed a Definitive Agreement with BioMet Partners, Inc. whereby Accu-Time Systems has purchased assets of BioMet Partners as they relate to the two-finger geometry biometric technology. Founded in 1992, the Switzerland-based BioMet Partners developed and patented the 3-dimensional, two-finger geometry biometric technology for use in applications such as workforce management (time and attendance, payroll, etc.) and security access.

The two-finger geometry biometric products are currently sold under various trade names such as the popular *Finger Foto* and *Very Fast*. The technology has proven to be an attractive alternative to fingerprint and other biometric technologies due to the flexibility and robustness of the two-finger geometry biometric technology when compared against other biometrics for certain applications.

Accu-Time Systems, a US-based leading provider of biometric and non-biometric workforce management and data collection terminals, has been manufacturing and incorporating the two-finger geometry biometric devices for over seven years. In 2005, Accu-Time Systems became the exclusive U.S. manufacturer of the two-finger geometry device. “We have had tremendous success with the product and believe strongly in the technology,” states Accu-Time Systems’ Founder and CEO Peter DiMaria. “We look forward to further integrating and enhancing the technology into our newest RoHS-compliant products for applications such as workforce management, data collection, and OEM applications,” adds Mr. DiMaria. The acquisition also adds numerous patents to an already impressive list of ATS-owned biometric technology patents around the world.

BioMet Acquisition
P. 2

Lisa Baumberger, General Manager of BioMet Partners, Inc. states, “We have had the pleasure of working with Accu-Time Systems for over seven years and have come to know the breadth of ATS capabilities and resources. It is with this knowledge that we eagerly and confidently look forward to watching ATS take this innovative technology to new heights.”

Specific terms of the agreement were not disclosed.

About Accu-Time Systems, Inc.

Accu-Time Systems, headquartered in the United States, is the leading provider of biometric and non-biometric workforce management (WFM) and human capital management (HCM) tools. ATS industry-leading products have become widely used for payroll, time and attendance, workforce management, and security access. With a product line that extends from simple entry-level time and attendance terminals to state-of-the-art programmable biometric systems, ATS provides solutions for nearly every industry in all corners of the globe. For more information about Accu-Time Systems, Inc., and the entire line of ATS products, call (860) 870-5000, e-mail sales@accu-time.com, or visit the ATS website at www.accu-time.com.
